# Five decades of Ogeborg

For over five decades and for two generations Ogeborg has been a family run business with its roots in Stockholm, Sweden. We are proud of our traditions and our wide product range of carpets and rugs, but are always looking forward to use and learn about new techniques and materials. The love for what we do shows in our work, being flexible and pleased to share our expertise in order to guide towards your vision and requirements. In our design collaborations we invite designers

to work closely together with us in the process, inventing new patterns, shapes and visual effects. We do everything with a great attention to detail and with a profound understanding of the tactile values a rug or carpet requires. We work with honest materials and long lasting high quality yarns that breathes tradition and craftsmanship. All qualities in this catalogue are available in custom sizes and shapes. Hand tufting is a very flexible technique which allow us to produce a large range of patterns.

The versatility makes hand tufted carpets and rugs a premium choice for both contract and residential use. A textile floor helps to define a room and the function of a space. It can set the tone for the whole interior or play a small modest part in enhancing the overall feeling. No matter where you start your project, we will assist you in making your choice and assure that your expectations are full-filled.

Welcome to Ogeborg!

Leif & Helene Ogeborg

# Astro

100% Botanical Silk

Astro is a luxury soft hand tufted rug made of botanical silk. Botanical silk is more shiny and slightly smoother than wool and linen. Astro is available in over 80 different colours and can be tufted in an optional width up to 9 meters.

# Design Collaborations

We are proud of our design collaborations and how our materials and production techniques can transform into new inspiring collections. When working with designers we get to see what can be invented through someone's senses and ideas. We explore possibilities, new techniques and work towards a common vision and goal to bring ourselves further.

## Where the light guides you

Eva Dahlgren, Alexander Lervik

The artist Eva Dahlgren and the designer Alexander Lervik has designed a collection of hand tufted rugs that varies in heights and composition for the exhibition "Where the light guides you". An exhibition where music interacts with hand blown glass sculptures from Målerås Glass Works and light installations.

# Care Advice

Regular cleaning is essential to maintain the appearance of your carpet. If you take good care of your carpet you will preserve the rug's original quality and extend its durability.

# Care

## Wool

Wool fiber is a product of nature and as with all natural products, a slight deviation in texture and color may occur from dye lot to dye lot. Where exact color match is required, please advise our customer service department and we will forward a cutting from actual production for customer approval prior to shipment.

Wool carpets must be cleaned regularly. Naturally, lighter rugs need to be cleaned more often than darker ones. When placing the order, clients should request a waterproofing treatment in order to preserve the rug's original quality and extend its durability.

## Botanical Silk & Linen

Linen and Botanical Silk carpets also have some specific features. One of them is the different color effect that it presents, especially when it is a plain carpet. Along the surface of the carpet, slight variations of color occur (similar to what occurs with velvet), which gives a different effect which becomes more evident in lighter carpets. This does not constitute a defect; this is simply a characteristic

of these cellulosic raw materials. Botanical Silk and linen are made of natural fibers. In this type of raw materials, a slight deviation in texture and color may occur from lot to lot. Where exact color match is required, please advise our customer service department and we will forward a cutting from actual production for customer approval prior to shipment.

## Cleaning

Regular cleaning is essential to maintain the appearance of your carpet. Use a good vacuum cleaner, which has at least 2000W of power and vacuum in the direction of the pile with a brush roll nozzle. Steam cleaning or any other methods which involve a substantial increase of temperature are not recommended. Regarding the botanic silk and linen carpets, it is highly recommended a foam washing

and not the use of water. For wool carpets, we recommend dry cleaning (water cleaning is only recommended if the water temperature isn't higher than 30°). For a deeper cleaning, please use a company specializing in carpet cleaning. It is very important to stress that our products' warranty does not cover ANY of the damages caused by negligent maintenance or incorrect and inadequate handling or cleaning.

## Variations

Slight variations might occur from dye lot to dye lot since Wool, Botanical Silk and Linen are natural raw materials. When an exact match of color is

required, indications must be given to our customer service and that information must be included in the purchase order.

# Responsibility

## Environment

For us it is evident that one should be committed to the climate responsibility and our environment. Ogeborg is a climate neutral company and since 2007 we invest in third world projects that reduce greenhouse gas emissions globally, which corresponds to our overall environmental impact. We aim to secure the production, transport and management of our products so they meet our high environmental requirements.

Ogeborg is certified with ISO 14001 and registered with EMAS which we value highly. The paper in this catalogue is printed at Göteborgstryckeriet which has the Nordic Swan Ecolabel. The paper, Munken, is produced only 10 miles from the print house. We think it is important to see what we can improve in every part of our business. This is just one more step for us to go towards a positive impact on our environment.
