Five decades of Quality

For over five decades and for two generations Ogeborg has been a family run business with its roots in Stockholm, Sweden. We are proud of our traditions and our wide product range of carpets and rugs, but are always looking forward to use and learn about new techniques and materials. The love for what we do shows in our work being flexible and pleased to share our expertise in order to guide towards your vision and requirements. In our design collaborations we invite designers to work closely together with us in the process, inventing new patterns, shapes and visual effects. We do everything with a great attention to detail and with a profound understanding of the tactile values a rug or carpet requires. We work with honest materials and long lasting high quality yarns that breathes tradition and craftsmanship. All qualities in this catalogue are available in custom sizes and colors. Hand weaving is a flexible technique which allow us to produce a large range of patterns. The versatility makes hand woven rugs a premium choice for both contract and residential use. A rug helps to define a room and the function of a space. It can set the tone for the whole interior or play a small modest part in enhancing the overall feeling. No matter where you start your project, we will assist you in making your choice and assure that your expectations are full-filled.

The rugs are traditionally hand knotted in old wooden looms and exclusively produced with care. A complex technique only possible by experienced hands.

Our traditionally hand knotted rugs are versatile and can be produced in different patterns, colors and sizes.

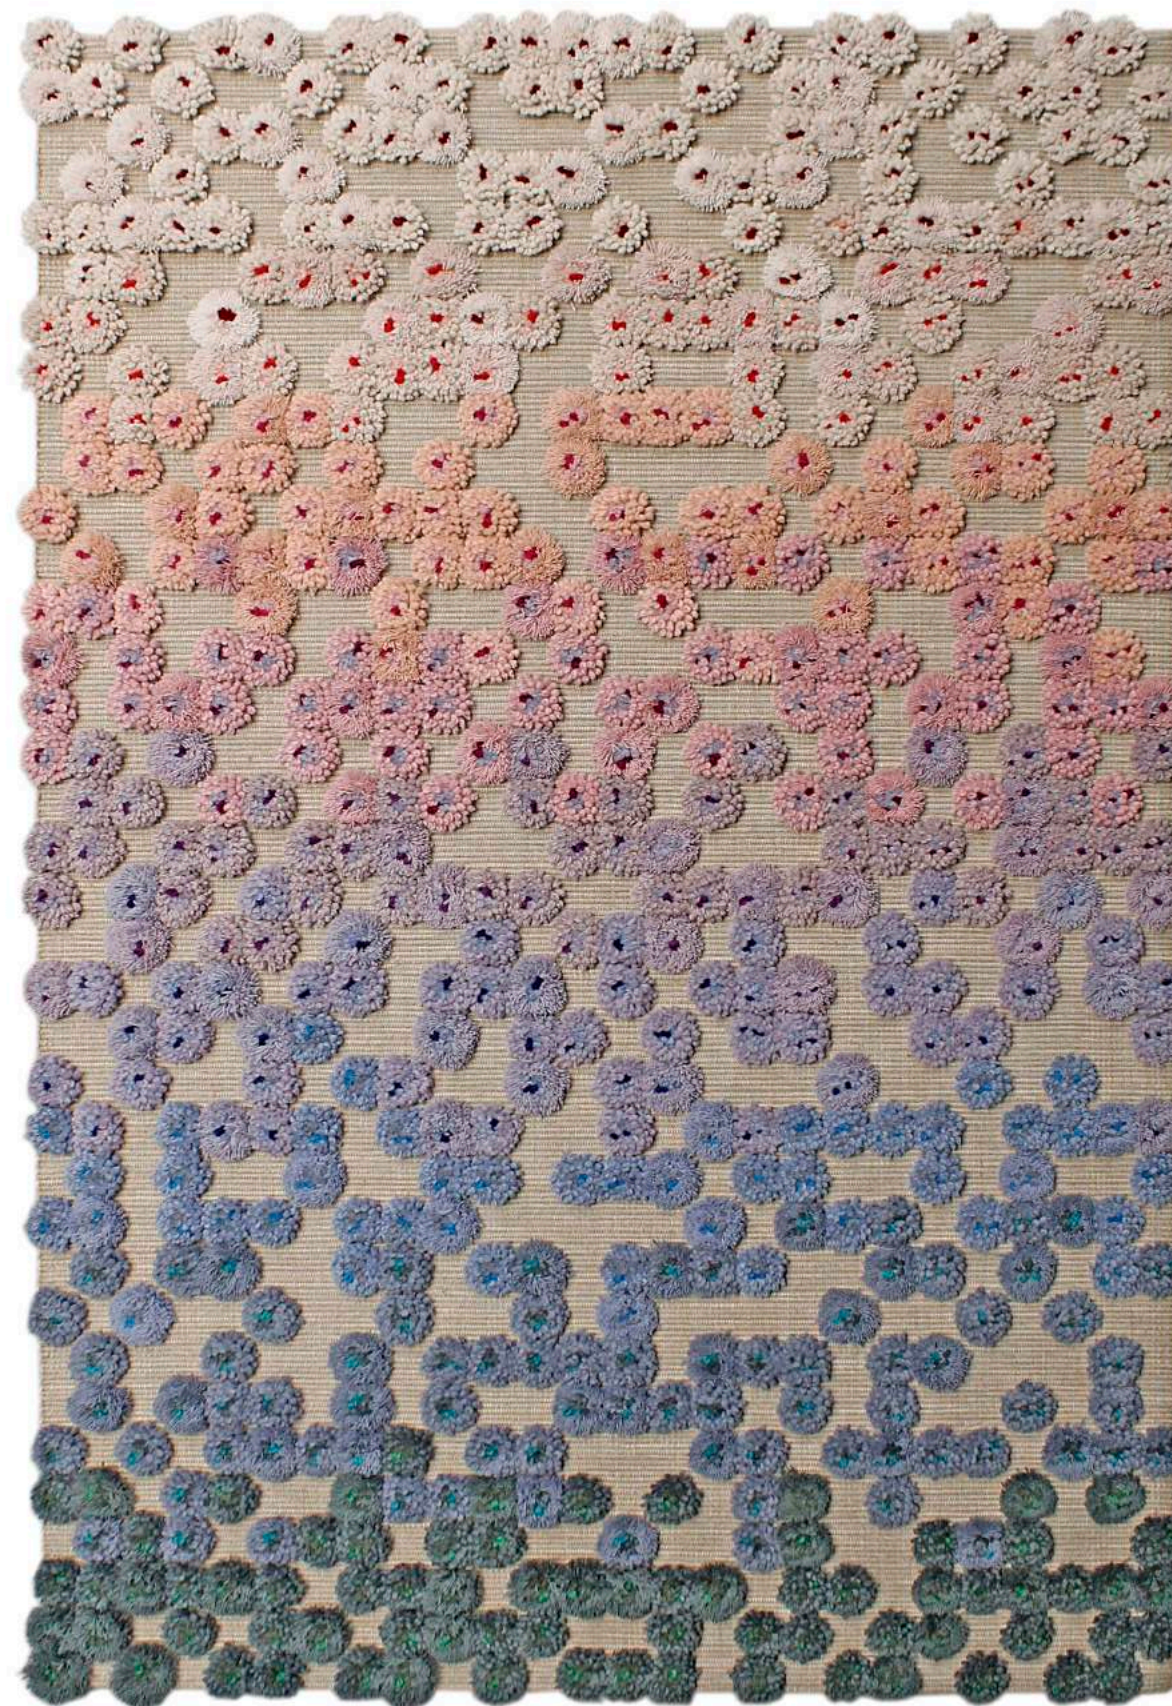

Hand Knotted

Garden

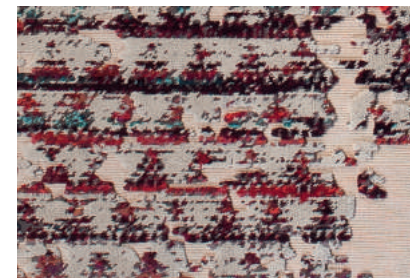

Wool & Jute

Available in a wide range of colors and custom sizes.

Maya

Wool & Jute

Available in a wide range of
colors and custom sizes.

Technical Details & Care Advice

1-2-3

1. Choose manufacturing technique and pattern.
2. Choose yarn, background color and pattern color.
3. Choose the finishing.

Our techniques are flexible and allows you to choose between different designs, combinations, colors and finishings to customize the rug. You can also choose to divide the rug into sections and have each woven with a different pattern, color and/or material. If you need any assistance or have any questions, feel free to contact us.

Hand Woven Wool Rugs

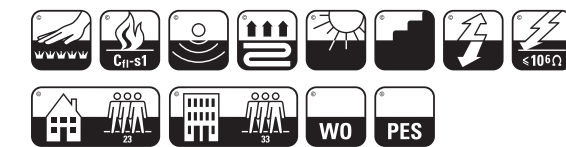

Our hand woven rugs are produced manually in traditional looms and the weaving process is called flat weave, as no knots are used and the surface looks flat. Two perpendicular rows of thread, the warp and weft, are interlaced to form the rug. Our woven rugs can be made up to five meters in width with no limit in length.

Composition: Weft 100% Wool. Warp 100% Polyester

Sizes: Width of up to 5m. No limit in length

Height: 8mm pile

Weight: 3,5kg/m²

Hand Woven Terrass Rugs

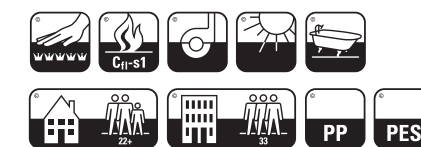

Inspired by the sea, our outdoor rugs are produced with the most durable and refined polyester or polypropylene ropes, which combine an incredibly high resistance to sunlight and wear with beauty, color and design. Produced in the same traditional looms, these rugs will add style and, above all, comfort to any exterior or interior environment.

Composition: Weft 100% Polypropylene or Polyester. Warp 100% Polyester

Sizes: Width of up to 5m. No limit in length

Height: 8mm pile

Weight: 4kg/m²

Wool

Wool fiber is a product of nature and as with all natural materials, a slight deviation in texture and color may occur from dye lot to dye lot. Where exact color match is required, please advise our customer service department and we will forward a cutting from actual production for customer approval prior to shipment. Wool carpets must be cleaned regularly. Lighter rugs need to be cleaned more often than darker ones.

Botanical Silk & Linen

Linen and Botanical Silk carpets also have some specific features. One of them is the different color effect that it presents, especially when it is a plain carpet. Along the surface of the carpet, slight variations of color occur (similar to what occurs with velvet), which gives a different effect which becomes more evident in lighter carpets. This does not constitute a defect; this is simply a characteristic of these cellulosic raw materials. Botanical Silk and linen are made of natural fibers. In this type of raw materials, a slight deviation in texture and color may occur from lot to lot. Where exact color match is required, please contact us for advise.

Cleaning

Regular cleaning is essential to maintain the appearance of your carpet. Use a good vacuum cleaner, which has at least 2000W of power and vacuum in the direction of the pile with a brush roll nozzle. Steam cleaning or any other methods which involve a substantial increase of temperature are not recommended. Regarding the botanic silk and linen carpets, it is highly recommended a foam washing and not the use of water. For wool carpets, we recommend dry cleaning. For a deeper cleaning, please use a company specializing in carpet cleaning. It is very important to stress that our products' warranty does not cover any of the damages caused by negligent maintenance or incorrect and inadequate handling or cleaning.

Variations

Slight variations might occur from dye lot to dye lot since Wool, Botanical Silk and Linen are natural raw materials. When an exact match of color is required, indications must be given to our customer service and that information must be included in the purchase order.

Environment

For us it is evident that one should be committed to the climate responsibility and our environment. Ogeborg is a climate positive company since 2018 and for over a decade we have been investing in projects that reduce greenhouse gas emissions globally, which corresponds to our overall environmental impact. We aim to secure the production, transport and management of our products so they meet our high environmental requirements. Ogeborg is certified with ISO 14001 which we value highly. The paper in this catalogue is printed at Göteborgstryckeriet which has the Nordic Swan Ecolabel. The paper, Munken, is produced only 10 miles from the print house. We think it is important to see what we can improve in every part of our business. This is just one more step for us to go towards a positive impact on our environment.

The Right Rug

A textile floor helps to define a room and the function of a space. It can set the tone for the whole interior or play a small modest part in enhancing the overall feel. All rugs in this catalogue are available in custom sizes and colors. Hand weaving is a very flexible technique which allow us to produce and combine a wide range of patterns. The versatility makes hand woven rugs a premium choice for both contract and residential use. Our yarn is carefully chosen and undergoes a strict quality control and we only use the most durable raw-materials. Ogeborg has a low environmental impact and we are a climate positive company since 2018. No matter where you start your project, we will assist you in making your choice and assure that your vision is fulfilled. Each rug is made with high quality materials, great craftsmanship and a long tradition that gives our rugs a timeless identity.

Thank you!
